

# REYMUND ABELGAS

Software/Application Developer

City of Mati, Davao Region 8200, Philippines | [reymund216@gmail.com](mailto:reymund216@gmail.com) | +63 9452138300 | [LinkedIn](#)

## Profile

---

Full-Stack Developer with hands-on experience developing responsive web and mobile applications using React, React Native, JavaScript, PHP, Firebase, MongoDB, and MySQL. Experienced in building end-to-end software solutions, integrating APIs, optimizing application performance, and collaborating with clients to deliver reliable products. Passionate about creating scalable applications and continuously learning modern technologies.

## Areas of Expertise

---

- |                               |                          |                                |                                  |
|-------------------------------|--------------------------|--------------------------------|----------------------------------|
| • UI/UX Design                | • Full-Stack Development | • Database Design & Management | • Mobile Application Development |
| • Web Application Development | • REST API Integration   | • Responsive Web Design        | • Cloud Deployment               |

## Professional Experience

---

### Full-Stack Developer, Self-Employed, Mati City

2024 to 2026

- Designed and deployed custom web and mobile applications tailored to client requirements.
- Developed responsive interfaces that improved usability across desktop and mobile devices.
- Integrated Firebase, MongoDB, MySQL, and third-party REST APIs to support secure data management.
- Diagnosed and resolved software issues through testing and debugging, improving application stability.
- Collaborated directly with clients from requirements gathering through deployment while meeting project deadlines.

## Featured Applications

---

### RESPONDR | Full-Stack Developer

React Native • Expo • TypeScript • Firebase • Cloudinary

- Engineered a cross-platform disaster response system for emergency agencies to coordinate resources, operations, and situation reports in real time.
- Built map-driven incident workflows with resource borrowing, personnel assignment, and automated SitRep document generation.
- Integrated custom IoT weather stations over Firebase Realtime Database with live sensor ingestion, threshold alerting, and historical analytics.
- Shipped iOS, Android, and web builds with Firestore sync, offline-first queuing, and resilient field operations in low-connectivity environments.

### Campus Mobility Platform | Full-Stack Developer

React Native • Node.js • MongoDB • Socket.io

- Developed a production-ready platform for digitizing employee gate passes and official travel requests across multiple campus sites.
- Implemented supervisor-to-HR-to-security approval pipelines with digital signatures, QR verification, and policy-based time balances.
- Delivered real-time dashboards and notifications; deployed mobile, web, and API tiers to cloud hosting

### Attendify | Full-Stack Developer

React Native • Expo • TypeScript • Firebase • Leaflet

- Built a cross-platform attendance platform for high-school admins and students across 70 sections with role-gated SuperAdmin, Admin, and Student workflows.
- Delivered QR scan check-in/out, morning/afternoon session tracking, and Excel report exports filtered by date, grade, and section.
- Integrated signed QR validation, KML geofence campus maps, Firestore real-time presence, and background location tracking.
- Deployed via Firebase Hosting and EAS with Cloud Functions for privileged user ops, throttled writes, and exponential backoff retry logic.

## **Barangay Business Permit Tracking System | Full-Stack Developer**

*PHP • MySQL • JavaScript • HTML/CSS • PDO*

- Developed a digital business permit management platform for a Barangay serving business applicants and BLPO staff through centralized application management.
- Designed a multi-status workflow from submission through payment and approval with document uploads and role-scoped dashboards.
- Built automated permit numbering, RA 7160 compliant renewal rules, and on-demand printable permit certificates.
- Delivered on LAMP with full audit trails, cron-based renewal reminders, and live notifications via AJAX polling.

## **Vetra | Full-Stack Developer**

*React Native • Expo • TypeScript • SQLite • Expo Router*

- Built an offline-first mobile POS for small retailers to manage sales and inventory without network dependency.
- Delivered cart-based checkout with stock validation, inventory decrement, and shareable receipt capture.
- Designed SQLite schema and service layer for products, sales, authentication, and business profiles.
- Shipped native Android build with PDF report export for daily, weekly, and monthly sales insights.

## **Education**

---

### **Davao Oriental State University, Mati City**

Bachelor of Science in Information Technology Major in Mobile Systems Development, 2022 to Jun 2026

## **Technical Proficiencies**

---

|                                    |                                                                |
|------------------------------------|----------------------------------------------------------------|
| <b>Programming Languages:</b>      | JavaScript, PHP, Java, Kotlin, HTML5, CSS3, Google Apps Script |
| <b>Frameworks &amp; Libraries:</b> | React Native, Expo, React (Vite), Laravel                      |
| <b>Databases:</b>                  | Firebase, MongoDB, MySQL                                       |
| <b>Cloud &amp; Deployment:</b>     | Vercel, Netlify, Render                                        |
| <b>Tools &amp; Platforms:</b>      | Git/GitHub, WordPress, Elementor, MySQL Workbench              |

## **Additional Experience**

---

### **Management Information Systems Intern, DICT - DOrSU, Mati City**

Feb 2026 to Mar 2026

- Assisted in the management, organization, and updating of digital records and information systems.
- Participated in system monitoring, documentation, and data management activities.
- Collaborated with the MIS team to support daily ICT operations and ensure efficient technology services.

### **Illumedia Intern, Illumedia Outsourcing Inc., Davao City**

Mar 2026 to Jun 2026

- Designed and developed responsive client websites from concept to deployment using WordPress and Elementor.
- Created website layouts, user interfaces, and content structures tailored to business and marketing requirements.
- Developed branding materials, graphic designs, and multimedia content using Adobe Photoshop, Illustrator, Canva, and CapCut.
- Collaborated with mentors and team members to deliver client projects within established deadlines and quality standards.
