EDUCATION

Davao Oriental State University

BS Information Technology

Major in Mobile Systems Development

General Weighted Average (GWA): 1.78 / 1.00

Relevant Coursework: Data Structures & Algorithms, Database Systems, Software Engineering, Web Development, Mobile Development, Cloud Computing

Mati City

2026

WORK EXPERIENCE

Full-Stack Developer | Self-Employed

Mati City, Davao Oriental

Jan 2024 – Present

- Delivered 5 full-stack web and mobile applications using React, React Native, Node.js, PHP, Firebase, MongoDB, and MySQL, managing the complete software development lifecycle from system design to deployment.
- Engineered scalable backend services with REST APIs, Firestore, Realtime Database, authentication, cloud storage, and role-based access control, integrating Cloudinary, geolocation, mapping, and QR technologies.
- Deployed production-ready applications on Firebase, Vercel, Render, and Netlify, optimizing application performance through reusable architecture, testing, debugging, and responsive UI development.

Illumedia Outsourcing Inc. | Web Developer Intern

Davao City

Mar 2026 – Jun 2026

- Developed and maintained responsive WordPress websites using Elementor, implementing custom layouts and UI components based on client requirements.
- Produced digital assets and branding materials while collaborating with designers and developers to deliver production-ready client websites.

Management Information System (MIS) - DOrSU | Intern

Mati City, Davao Oriental

Feb 2026 – Mar 2026

- Prepared and standardized 10+ institutional documents, manuals, and digital records supporting the university's Management Information Systems operations.
- Assisted with ICT documentation, data organization, and quality assurance to improve the consistency and accessibility of institutional information.

PROJECTS

RESPONDR

2025

- Built a cross-platform disaster response platform with 6+ operational modules supporting incident management, personnel, logistics, resource management, weather monitoring, and situation reporting.
- Implemented Firestore, Realtime Database, offline synchronization, IoT weather integration, interactive mapping, automated Situation Report generation, and Cloudinary media management.

Attendify

2026

- Built a cross-platform attendance management system supporting 70+ class sections with QR authentication, Firestore real-time synchronization, geofencing, and role-based access control.
- Optimized background location tracking, Firestore write operations, interactive campus maps, and Excel reporting for efficient attendance monitoring.
